- ✓ **Leadership:** Managed teams of young workers
- ✓ **Time management:** Handled high-school and college courses
- ✓ **Collaboration:** Worked with teams in person and on the web
- ✓ **Poise:** Awarded best in impromptu speaking and exposition
- ✓ **Problem solving:** Helped students diagnose program errors

After moving to Nebraska to focus on my education, I heard about The Career Academy. As a home-school student I overcame many hurdles to sign up, but I persevered them and am doing well. Since I was eight I have loved programming, and now I am looking for the next step. An internship would give me experience and the ability to test my skills on something more substantial than personal projects. A mentor would be a great help in allowing me to achieve my goals.
